DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11, 19-21, 23, 25, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over See et al., U.S. Patent 5,674,762 in view of Sung et al., U.S. Patent 6,194,269 B1.

The rejection is maintained as stated in paper #4 mailed 11-8-01 for the reasons of record.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schlais et al., U.S. Patent 5,153,143 in view of Shimizu et al., U.S. Patent 4,651,046.

The rejection is maintained as stated in paper #4 mailed 11-8-01 for the reasons of record.

Response to Arguments

Applicant's arguments filed 5-21-02 have been fully considered but they are not persuasive. In response to applicant's argument that there is no suggestion to combine the references of See and Sung, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the

Art Unit: 2812

claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation to have a split gate memory device in the primary reference is clearly laid out in the previous office action. With respect to the Schlais et al. reference, the transistor 64 would be expected to operate at a higher voltage than the CMOS transistors, since the transistor 64 is associated with the memory device which operates at higher voltages than the CMOS transistors.

Allowable Subject Matter

Claims 24, 26-27, and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2812

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
